The turbo wet-cleaning machine for travelators and escalators

**Das  
Original!**

Made in Germany

**Cleans right to the edge – and much faster!**

*Tip-Top on Top*

## JUMA Reinigungstechnik. The security of the original.

Nationally and **worldwide**, the compact machines from JUMA are regarded as the highest quality products.

JUMA cleaning devices are 100% quality made in Germany. Please always pay attention to the JUMA logo – and you will have the **guarantee of the original** with all service benefits.

Cleaning, hygiene and **German quality** are a **family tradition** at JUMA Reinigungstechnik GmbH. For about 20 years, the developers have been in close contact with leading businesses. JUMA attaches particular importance to understanding customer needs and to supporting effective work. Based on years of **experience** as a supplier of machines for industrial cleaning, JUMA Reinigungstechnik relies on **mechanics** instead of encapsulated electronics – a principle that is greeted by all who want to work **trouble-free**.

Also, in the **case of service**, JUMA is known for exceptionally fast and reliable performance.

**JUMA dealers** worldwide are always **competent** partners. And always close to you.

# Why struggle when there's a quick and thorough alternative?

Escalators and travelators are designed to help people get from A to B **more quickly**. The TRAVEL 600 is similarly efficient: with thorough cleaning cycles and a housing solution that gets right up close to the **edge**.

## The answer to time pressure: negative pressure!

Unlike conventional cleaning machines, the TRAVEL 600 relies on the highly **effective power** of a secure vacuum-type mechanism. For this, the right **technology** and the **interaction** of the brushes and suction unit are crucial. Only by creating a **vacuum** can dirt be thoroughly dissolved and removed with a sufficiently high **water input** – and without any water getting into the steps.

JUMA stands for reliable quality. For innovative design. And the good name of a German quality product.

Savvy users know:  
when under pressure, what you need is negative pressure!

### Ergonomics

The TRAVEL 600 is ideal for **single-handed** operation and transportation. The **15 l water tank** is integrated and easily transportable thanks to the **grip handle**.

# The Formula 1 for escalators and travelators. Quick and effective!

## Speed

The TRAVEL 600 is **simply placed on the step**. You only need to lock it in place once – **no special adjustment** is necessary. The machine works **while the escalator/travelator is in operation**. What's more, the escalator/travelator can be used again **immediately afterwards**.

## Operator comfort

Operation is **simple**: there are **3 pre-set programmes** with different levels of water consumption. The programme is selected according to the degree of soiling and the operating speed of the escalator/travelator.

**A warning tone** sounds if the vacuum breaks down, foreign objects are sucked in or the water supply runs out. In this case the cleaning head lifts up automatically and the machine switches itself off.

**Foreign objects** can be discarded by simply removing the suction roller.

## Safety

The weight of the cleaning head keeps the TRAVEL 600 firmly and securely in place on the step. The **suction power** is strong and reliable, thanks to the compact suction unit with optimal **negative pressure monitoring** – even if **foreign objects** are sucked in and the vacuum breaks down. **No water** can get into the escalator/travelator, and the machine cuts out immediately in the event of a disturbance.

## Cleanliness

The successful formula: mechanical energy + detergent + water.

The machine is equipped with a plethora of bristles of different lengths for cleaning and precise channelling of the water. These are arranged in a wedge shape and are counter-rotating. The **vacuum** between the brushes increases the air intake, and the dirt is sucked in effectively at a very high air speed.

## Environment and sustainability

JUMA cleaning appliances are especially **durable**. We use high-quality aluminium and stainless steel based on proven experience. Water and chemicals can be used **economically** thanks to cleaning programmes tailored to the degree of soiling.

## Workmanship

The hallmark of the TRAVEL 600 is its **exceptionally large number of brush tufts** – your guarantee of quality and hygiene.

## Technical data

**Length:** 1195 mm

**Width:** 536 mm

**Height:** 930 mm

**Working width:** 2 x 200 mm

**Noise level:** 78 ± 2 dB (A)

**Weight:** 126 kg

**Power supply:** 110 V & 230 V

**Frequency:** 50/60 Hz

**Rated power consumption:** 3.000 W

**Fresh water tank:** 15 l

**Dirty water tank:** 15 l

**Extraction air quantity:** 162 m<sup>3</sup>/min

**Underpressure:** 300 mbar

**Number of brushes:** 4

**Number of suction rollers:** 2
